

Introduction to Artificial Intelligence

Fall semester 2026
Anders Lyhne Christensen

How?

- One/two lectures + exercises per week
 - Thursdays 12.00-16.00
 - Some Wednesdays
- Slides and exercises will be made available on Itslearning (<https://sdu.itslearning.com>)
- Exercises
 - Python/Jupyter notebooks (very hands on)
 - Will be important at the exam
 - You can work in pairs on solving the exercises
- Workload

7.5 ECTS, ~6 hours of contact per week + same as homework

Evaluation

- 20-minute individual oral exam.
- Draw one random question among a set of a priori known questions.
- Present for 7-8 minutes, theory and associated practical exercises, **must include results**.
- Questions for 7-8 minutes on the question drawn, the presentation, practical solution to the exercises, and course material in general.

Questions?
